

CPA: DISCOVER A WORLD OF OPPORTUNITY

THE PERKS OF BEING AN ACCOUNTANT

A career in accounting is a career with far more potential than you ever imagined. It's an exciting and growing profession with numerous opportunities for personal and professional growth and success throughout your lifetime.

Becoming a Certified Professional Accountant (CPA) can open even more doors and opportunities in your career! It may be a rigorous process, but the benefits are well worth the extra effort.

ACCOUNTANT VS. CPA: WHAT'S THE DIFFERENCE?

All CPAs are accountants, but not all accountants are Certified Public Accountants. CPAs are highly regarded, licensed professionals who:

- Have met their state's higher education, work experience requirements and ethics requirements
- Have passed all four sections of the CPA Exam
- Are licensed by their state's board of accountancy
- Maintain a commitment to high ethical standards

CPA = ENDLESS CAREER OPPORTUNITIES

The old stereotype of the boring accountant endlessly crunching numbers in a small office is far from reality. Today, becoming a CPA can lead to a number of exciting career options. Here are just a few:

- Tax and Financial Planning
- Business and Industry
- Forensic Accounting
- Information Technology and Consulting
- Education
- Government
- Public Accounting

THE VALUE OF A CPA LICENSE

You might be wondering if you need to spend the extra time and effort to get your CPA license. "Can't I make a decent living as an accountant?" Well, sure. But the CPA is a credential that sets you up for a different career. Here's why:

Prestige and Respect

After years of academic and technical training – and passing the rigorous CPA Exam – CPAs are often viewed as an elite group of professionals.

Competitive Edge

Earning a CPA license demonstrates your commitment to the profession and provides a competitive advantage when applying for jobs or leadership/management positions.

Income Potential

CPAs make 5%-15% higher salaries than their non-CPA counterparts— which can add up to more than \$3 million over a 40-year career!

Career Security

Due to a shortage of experienced accounting professionals in business today, CPAs are in more demand than ever before.

Job Satisfaction and Variety

CPAs have a plethora of career paths to choose from and have above-average flexibility and upward mobility.

STEPS TO CPA GREATNESS

Remember the four E's – Education, Examination, Experience and Ethics. Here are the general guidelines for certification in Texas:

- Get your bachelor's or graduate degree
- Complete 150 semester hours of college credit
- Pass the CPA Exam
- Complete one year of full-time accounting work experience under the direct supervision of a licensed CPA
- Pass ethics exam
